

CC-104III

E.M.T Pipe Hydraulic Punching Tool

- ◆ Applicable to change the sizes of the hole for the thin electric wire, or modifying or adding additional holes.
- ◆ Fast punching without any burrs, notches, nor sparks, which improves the appearance and increases the value of the product.
- ◆ Light, portable, easily changing dies.
- ◆ Die formats: D19, D25, D31, D39, D51, D63, and D75mm.
- ◆ The max. punching capacity: Iron – D75x3mm; Stainless steel – D75x1.2mm.
- ◆ Need to coordinate with hydraulic pump (CP-180).

CC-104RW

Ratchet Punching Tool

- ◆ Starting with drilling a hole on the switchboard, then make the axis through the hole, matching the needed die size, and finishing with putting on the adjustable ratchet wrench, then rotate it.
- ◆ Fast punching without any burrs, notches, nor sparks, which improves the appearance and increases the value of the product.
- ◆ Saving effort, easily changing dies, light, portable, no need to coordinate with hydraulic pump or cylinder set.
- ◆ The max. punching capacity: Iron – D60.8(2")x3mm; Stainless steel – D60.8(2")x1.2mm.
- ◆ Able to customize molds in any sizes.

Item	Output (TON)	Max. Punching Thickness (mm)	Standard Die (mm)	Weight (kg)
CC-104III	12	Iron 3 , Stainless Steel 1.2	D19,D25,D31,D39, D51,D63,D75	8.3
CC-104RW	—	Iron 3 , Stainless Steel 1.2	1/2"(22),3/4"(27.5),1"(34.3), 1 1/4"(43),1 1/2"(49),2"(60.8)	3.7
